

Lüderitz Bay Shipping & Forwarding

Lüderitz Bay Shipping & Forwarding

is one of the oldest logistics and shipping companies in Namibia's southern port of Lüderitz. We pride ourselves in tackling the most challenging freight handling and forwarding tasks by finding the most cost-effective freight solutions for any type of logistics, ships agency, and customs clearance requirements.

ABOUT LBSF

Lüderitz Bay Shipping & Forwarding (LBSF) was established as Lüderitz Bay Shipping on 1 February 1992 by John Gillham who had gained a wealth of shipping experience in Cape Town. The company soon gained major clients in the region and was appointed agent for the oil company Shell. LBSF played a significant role in the first containerisation of frozen fish at the Lüderitz port.

In 1998, Gillham sold the majority share of the company to Manica Group Namibia. It was then merged with the existing Woker Freight Services branch in Lüderitz to form Lüderitz Bay Shipping and Forwarding.

Since then LBSF has distinguished itself as the leader in clearing and forwarding services, mining logistics, ships agency, bunkering and shore based logistics solutions for oil and gas exploration campaigns. LBSF provides clearing and forwarding, shipping, ships' agency, bunkering and warehousing services for all types of cargo, vessels and industries.

The company specialises in full logistical support to oil and gas exploration and drilling ventures off and onshore Namibia, Manica is also confident in its ability to mobilise various additional resources in diverse disciplines, to complement the in-house capabilities, thus ensuring a broad, high-quality range of one-touch services.

Customs Clearing & Forwarding

Mining logistics solutions

Abnormal & Project Cargo

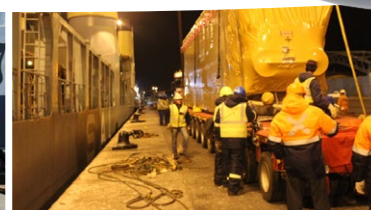

Bulk imports and exports

Port and Ships Agency Services

Critical spares and parts logistics

Shorebased Oil & Gas logistics

Transport solutions, Bunkering
